

TOWN MEETING 9TH MAY 2023

We are very happy to have been re-elected to be your Watton District councillors, it is a privilege, and we thank those that voted for us.

This now means that we can continue the good work we started over the last 4 years.

Since the pandemic things have been very hard for us all. But through Breckland and its welfare help and support for local business's, many have survived, and will continue to grow.

The market town initiative money has been spent sprucing up our assets within the town. The cherry trees and flags look amazing within the high street.

The loch and sports centre has benefited from better access to the loch via the car park, better lighting on the fields, and a wonderful new boardwalk around the loch making the area accessible to all.

We will continue our fight for better infrastructure and make sure S106 money from developers is spent wisely on services and assets for our town and residents.

That is why we are so pleased to have secured the s106 money 107K of it, to go towards the development of a brilliant new skate park at the sports centre. Planning is in progress, and we hope this will start soon. This will be a huge asset to Watton and the youth of our town.

Through working together with the chamber of commerce and the Wayland partnership, Breckland has committed to help with the feasibility study to bring the Digital and Marketing Media centre to Watton, this is something that will really put Watton on the map.

Breckland is an enterprising member led council and through careful management of its finances and assets it continues to provide value for money for residents by maintaining the lowest council tax in Norfolk, whilst still providing best service.

We are very proud to be part of that enterprise and initiative.

We will continue to keep Watton on the table and fight to make it a better place for us all.
